What it should *feel* like

Groupify blends a high-end editorial magazine feel with a playful, sticker-and-collage energy. It reads premium but never corporate — youthful, social and rooted in real-life meetups in your city.

Design principles

1 • Editorial serif meets clean sans. Big high-contrast serif headlines (roman + italic mix) carry emotion; a neutral grotesque handles all UI and body copy.

2 • Duotone halftone photography. Real people, printed-zine dot texture, tinted in rich rotating colours (maroon, violet, gold, navy).

3 • Colour as taxonomy. Every interest / event category owns a colour. Cards are full-bleed colour or soft pastel tints of it.

4 • Collage & stickers. Hand-drawn stars, pointing hands, calendars, polaroids and “REC” frames add human, tactile warmth.

5 • Soft, rounded, pill-shaped. 22px cards, fully-rounded buttons, gentle shadows. Nothing sharp.

6 • Real place. A real map (Zürich) with photo pins grounds the product in the physical world.

One-line positioning

“The social app for finding & organizing *group events* around shared interests.”

Colour *system*

A calm neutral + navy base, one confident royal-indigo primary, and a broad category palette used as full colours and soft pastel tints. Hex values are close reads from the screens — confirm against the Figma design-system page for pixel accuracy.

Core & primary

 Ink #14163A	 Navy surface #16193B	 Primary indigo #3A34D6	 Primary strong #2F2AB0
 Paper #FFFFFF	 Cream #F6F1E7	 Muted text #6B6F80	 Hairline #E7E7EE

Category palette — full + soft tint

 Orange #E8641E / #F9DDC8	 Yellow #F2CE1B / #F8EFB2	 Green #2F8F5B / #DCEFE0	 Royal blue #2B2CA6 / #DCE3F8
 Purple #6A34D6 / #E7DBF8	 Red #E23B34 / #F7D8D5	 Maroon / pink #6F1F2A / #F5DBE4	 Teal #1FA79F / #D5EFEC

Semantic

 Like / unread · #E23B34	 Link · #3A34D6	 Success / Host · #2F8F5B	 Location · #E8641E
---	--	--	--

Type & voice

Two families do all the work: a high-contrast editorial serif for expression, a neutral grotesque for everything functional. A handwritten face appears rarely, as an accent.

Suggested type scale

TOKEN	FONT	SIZE	WEIGHT	USE
Hero	Playfair	clamp 46–86px	700	Hero headline
H2	Playfair	32–52px	700	Section titles
H3 / card title	Playfair	18–26px	700	Card & event titles
Lead	Inter	17–21px	500	Sub-headlines
Body	Inter	16–17px	400	Paragraphs
Label / meta	Inter	11–13px	600	Tags, dates, nav
Eyebrow	Inter	10px · +0.16em · UPPER	600	Section kicker

Icons & categories

Rounded line icons ($\approx 2\text{px}$ stroke, round joins). Category icons carry their category colour on a soft tinted tile; UI icons are monochrome ink. Below are on-brand redraws of the set seen in the app.

Interest / category icons

UI icons

home · compass · star · chat · bell · search · filter · plus · calendar · people · lock · pin · share · heart · gear · bookmark · arrow

Buttons, inputs & controls

Everything actionable is a fully-rounded pill. One primary (indigo), a dark navy for in-context actions ("Join"), and cream for actions on dark or photographic backgrounds.

Buttons

Primary · Navy · Cream · Ghost/secondary · Disabled (tinted primary + counter)

App-store buttons (hero)

Bottom navigation

Cards & surfaces

The hero component. Event cards come as full-colour (category) or soft pastel tints, always with a polaroid-framed photo, a date row, a serif title, host and an attendee pill. ~22px radius, soft deep shadow.

Club card

Ticket / stat card

Notched "ticket" edges echo the events theme. Used on profile & settings.

Badges, tags & overlays

Small status elements use soft-tinted pills; the playful “Almost full!” sticker tilts slightly like a hand-applied label. Dark navy sheets host welcome / CTA moments.

Status & role badges

Interest chips

Dark sheet / overlay

Map event pin

Italian class

Pins are a rounded photo thumbnail + a coloured date badge; clusters show “+N more”. They sit on a muted, real map of the city (Zürich).

Photography & *stickers*

Imagery is the soul of the brand: printed-zine halftone duotone for hero moments, and tactile photo frames (polaroid, filmstrip, viewfinder) inside cards. Hand-drawn stickers add warmth on headlines.

Duotone halftone — colour-shifting

Photo frame treatments

Sticker / collage accents

Applied at slight rotations with a soft drop-shadow, as if stuck onto the headline. Used sparingly, one or two per screen.

Spacing, radii & *elevation*

Generous, airy spacing on an 8-pt rhythm; soft rounded geometry throughout; low, diffuse shadows that keep the UI light.

Spacing scale (8-pt)

Screen side margins $\approx$ 20–24px · card padding $\approx$ 14–16px.

Corner radii

Elevation

Screen *inventory*

The app surfaces captured in the Figma “UI delivery” file (plus state screens). Screens best suited to the landing page are marked ★.

Sign-up ★	Duotone halftone hero, rotating serif headline “Find your people / events / clubs”, Apple & Google pill buttons.
Onboarding (11 steps)	White screens, serif question headlines with stickers, progress bar, indigo pill “Next”, interest chips, date wheel, invite contacts.
Discover · Map ★	Real Zürich map, photo event pins with date badges, search + city filter, floating event preview card.
Home / “For you” ★	Personalised feed: hosted events, recommended clubs (navy), events-you-may-like, alternating white / navy sections.
Event cards ★	Full-colour & pastel category cards with polaroid photo, date, serif title, host, attendee pill.
Clubs ★	White club cards on navy: category tag, title, description, member stack, Join.
Feed	Social posts: avatar + role badge, text, photo, location tag, like / comment / share, dotted dividers, embedded event cards.
Chat	Conversation list with All / DMs / Events / Clubs filter, unread pastel rows + red count badges.
Profile	Polaroid avatar, serif name, ticket stat cards (events / clubs), Feed / About tabs.
Settings	Ticket-notch cards with coloured circular icons (Privacy, Notifications, Payments, Payouts, Login), list links, Sign out.
Search overlay	White sheet, Events / Clubs / People tabs, location + query fields, recent searches.
States	General loaders, general errors, pull-to-refresh, notification center — playful, on-brand.

Bring the app's *soul* to the web

The landing page inherits these exact tokens — editorial serif headlines, indigo pills, colour-coded cards, duotone imagery and collage stickers — so it feels like screen 0 of Groupify, not a separate website.
